

# FIRA MEDITERRÀNIA DE MANRESA

## 2022 CARBON FOOTPRINT

**Fira Mediterrània is reaffirming its commitment to the environment through ongoing and sustained efforts to ensure the sustainable and respectful management of the event on an environmental, social and economic level.**

**4**  
Days

**1,122**  
Registered delegates

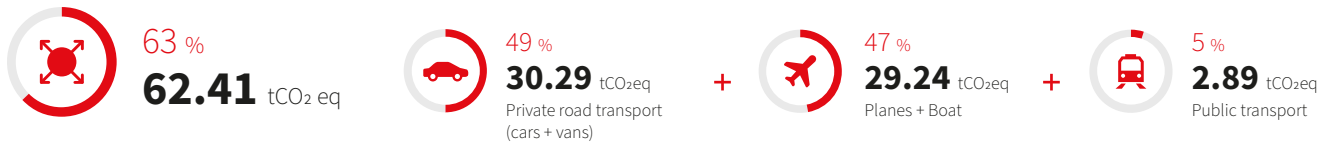

**112**  
Artistic companies

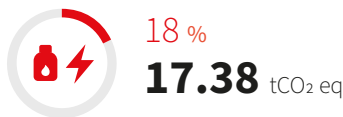

**20**  
Stages

### WHERE DO THE GHG EMISSIONS WE HAVE PRODUCED COME FROM?

#### TRAVEL BY PROFESSIONALS, PRESS AND ARTS COMPANIES

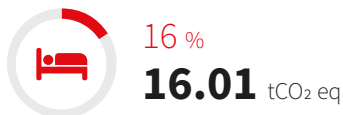

#### ENERGY CONSUMPTION

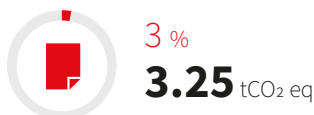

Electricity and fuel consumption by equipment and generators.

#### OVERNIGHT STAYS AND SUBSISTENCE

Hotel stays and restaurant vouchers for artistic companies.

#### PRINTED MATERIALS

Usage of banners, postcards, merchandising bags, etc.

**100 %**  
**99.05** tCO<sub>2</sub> eq

**Raise awareness, reduce and offset the carbon footprint through targeted measures:**

- Consumption of electrical energy and generators.
- Promoting sustainable mobility for professionals, arts companies and attending audiences.
- The use of sustainable and environmentally friendly materials.
- Food waste prevention.
- Calculating greenhouse gas emissions resulting from the organisation of the event.
- Committing to offsetting emissions that could not be minimised.

**Fira Mediterrània has compensated for the residual GHG emissions that it has been unable to avoid by offsetting tonnes of CO<sub>2</sub> through the Climate Change Office of the Government of Catalonia. In total, 100 tCO<sub>2</sub> have been offset in projects from Bag 2 of the Voluntary Emissions Offset Programme, comprising 11 intervention projects in social centres in Catalonia.**

### ACHIEVING A SUSTAINABLE FIRA

Fira Mediterrània Manresa understands that sustainability objectives are now more vital than ever and is working to integrate the **2030 Agenda** into its event and to align with the **Sustainable Development Goals (SDGs)**. We want to create a space for connection between culture and sustainable development, over and above the climate emergency and environmental sustainability.
