#### **ENERGY CONSUMPTION**

17.95 tCO2 eq

Electricity and fuel consumption by equipment and generators.

100 %
131.49
tCO<sub>2</sub> eq

Raise awareness, reduce and offset the carbon footprint through targeted measures:

Consumption of electrical energy and generators.

Promoting sustainable mobility for professionals, arts companies and attending audiences.

The use of sustainable and environmentally friendly materials.

Food waste prevention.

Calculating greenhouse gas emissions resulting from the organisation of the event.

Committing to offsetting emissions that could not be minimised.

### **OVERNIGHT STAYS AND SUBSISTENCE**

6 % **7.60** tCO<sub>2</sub> eq

Hotel stays and meals for artistic companies.

#### **MATERIALS PRODUCED**

2/% **36.27** tCO<sub>2</sub> eq

Usage of banners, programmes, merchandising bags, etc.

Fira Mediterrània
has offset the emissions
of residual GHGs that it could not
avoid with the offseting of tons of
CO<sub>2</sub> via the Climate Change Office of
the Government of Catalonia. In total
they have offset 130 tons of CO<sub>2</sub> in
projects from the Bag 3 of the
Voluntary emissions compensation
Program, including 17 action
projects in centres social

services of Catalonia.

## **ACHIEVING A SUSTAINABLE FIRA**

**Fira Mediterrània Manresa** understands that sustainability objectives are now more vital than ever and is working to integrate the **2030 Agenda** into its event and to align with the **Sustainable Development Goals (SDGs)**. We want to create a space for connection between culture and sustainable development, over and above the climate emergency and environmental sustainability.
